

Tired of the Same, Old Games??

Make your own DoubleBall or HackySac

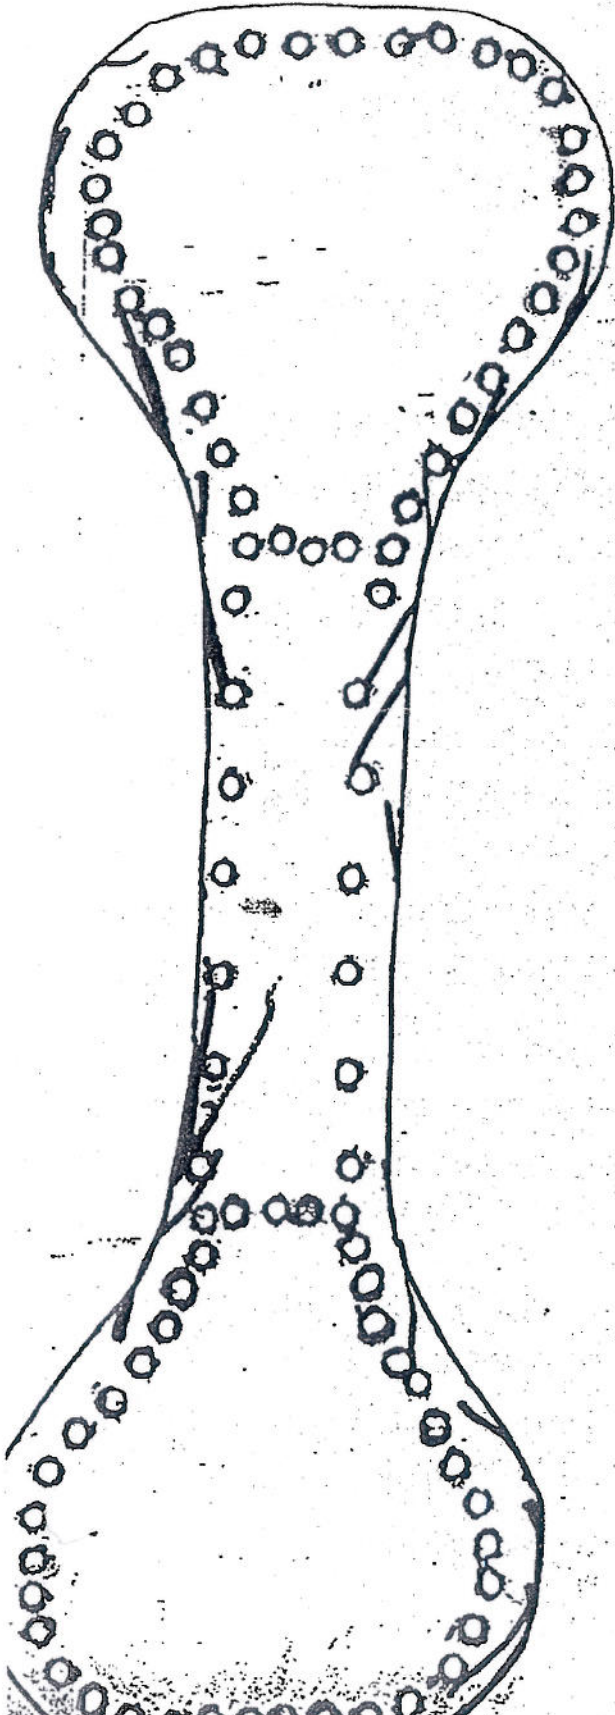

DoubleBall

1. Lay out leather and place pattern along edge or side
2. Select leather side you want out/external, and place pieces reversed (with inside/out)
3. Mark pattern holes and edge w/ pen or marker on inside surface (it takes two identical pieces)
4. Carefully cut out both leather pieces with scissors
5. Punch holes with nail & hammer (on board) per pattern
6. Get ~40" piece of sinew and thread onto needle
7. Tie knot in end of sinew and start inside at same point at one end of D'ball, keeping tight & smooth
8. Stitch 85% around one end, then carefully use a rounded object to push/work the pieces through until desired external side is outside, smooth seams
9. Fill D'ball pouch with popcorn and stitch closed, leaving knotted sinew tucked under seam edge to hold snugly
10. Stitch mid-strap to other end & repeat (#7-9)
11. Stitch close filled pouch and stitch the last side of mid-strap
12. Select a limber stick, grab some friends and have FUN!

HackySac (same as above except)

7. Tie knot in end of sinew and start stitching inside at alternate points (top/mid), keeping tight & smooth
8. Stitch all around HackySac leaving only 4-5 holes open, then push through, smooth seams, fill with popcorn, and stitch to close, leaving knotted sinew tucked under seam edge to hold snugly
